

Denton Women's Interracial Fellowship Monument & Industrial Street Park Design

Drew Huffman

Parks and Recreation Director

Exhibit 3

Artist – Dina Fisher

- Multi-media artist creating “nuanced” public art including murals to interactive sculptures.
- Involves community in the design process.
- Has family history similar to members of the DWIF.

Artist Inspiration

The DWIF Memorial Art Installation bursts with every color of the rainbow, celebrating the visionary women of DWIF. Through the lens of hope, love, trust and friendship, they overcame cultural barriers to help Denton re-imagine race relations.

Art Style

- “ANIMATED” DISC - LENTICULAR ART
- The installation’s most prominent piece is a monumentally sized disc whose colors morph and change as the person viewing it moves. This animation affect is achieved with a process called “lenticular” art. There’s no electricity or computer involved, it’s a purely physical phenomenon.

Project

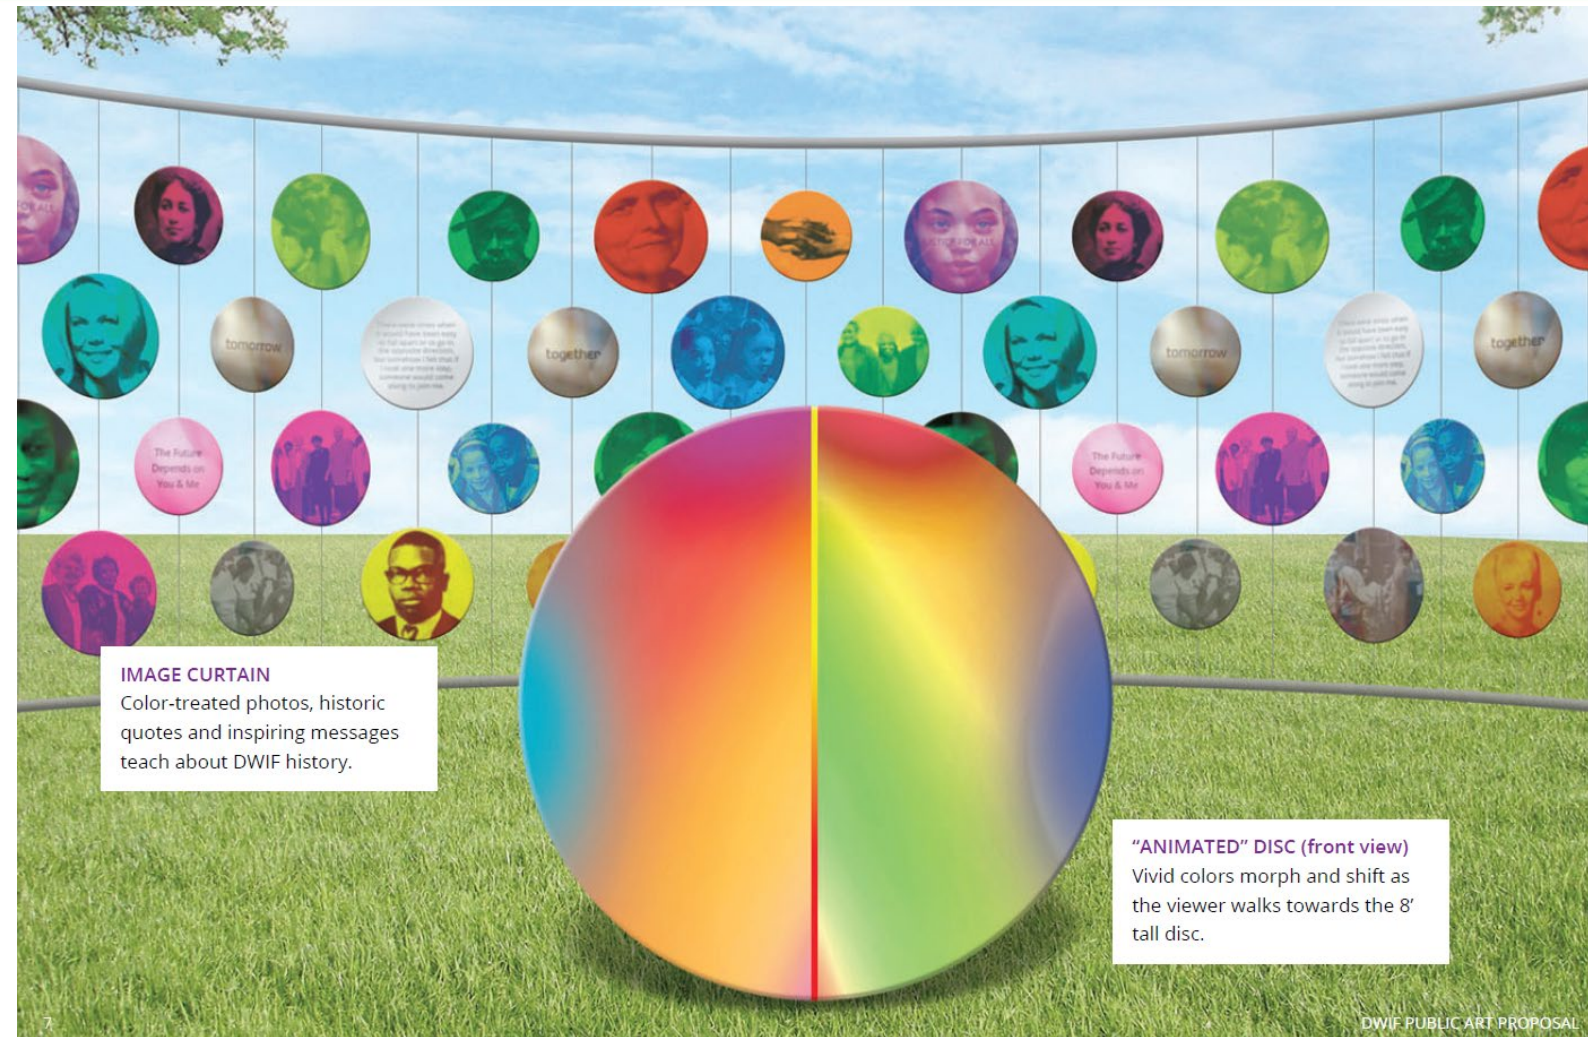

IMAGE CURTAIN
Color-treated photos, historic quotes and inspiring messages teach about DWIF history.

"ANIMATED" DISC (front view)
Vivid colors morph and shift as the viewer walks towards the 8' tall disc.

Project

Project

Art Lanterns are arranged along the gently arcing walkway, between the installation site and Senior Center.

Each lantern is unique, with its own imagery and graphic design.

SOLAR LIGHT

Dichroic glass has fiery translucent sheen that shifts color when the viewer moves.

PHOTOGRAPHY

Some lanterns will feature Denton's 2020 youth. Others will show 1960s and historic photos.

MATERIALS

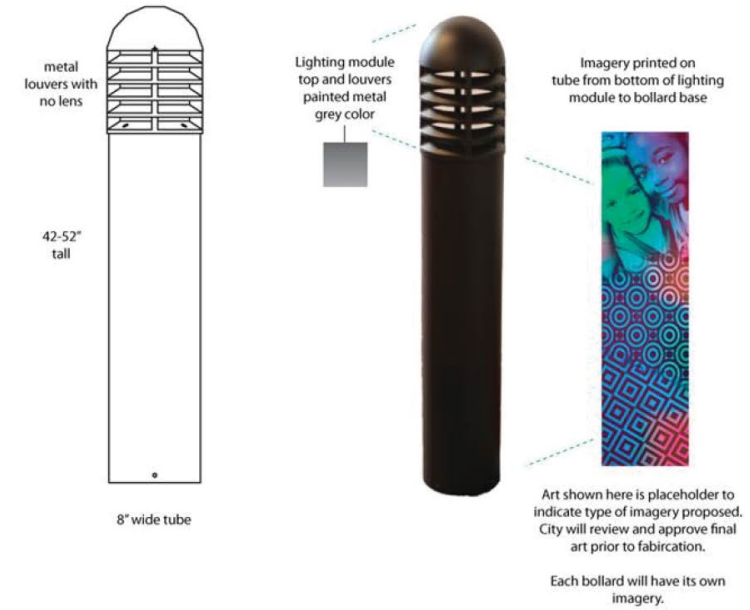

Walkway lanterns are 10" x 48" cylinders made of strong aluminum used for Image Curtain discs.
